## **DETAILED ACTION**

### **Restriction/Election Requirement**

1. Restriction to one of the following inventions is required under 35 U.S.C. § 121:
  - I. Claims 1-20, drawn to a method and computer system for analyzing gene expression, classified in class 702, subclass 19.
  - II. Claim 21, drawn to polynucleotides, classified in Class 536, subclass 23.1.
2. The inventions are distinct, each from the other because of the following reasons:
3. The inventions of Groups I and II are independent because group I is directed to a method for analyzing gene expression involving statistical analysis, and group is directed to a polynucleotide. The polynucleotide of group II is not used in the method of group I, nor is it made by the method of group I.
4. Because these inventions are independent/distinct for the reasons given above, have acquired a separate status in the art, and thus are usually published separately in the literature because of their recognized divergent subject matter, and/or acquired a separate status in the art as shown by their different classification, there would be undue search burden if they were examined together. The search for the two groups would not be coextensive because of the reasons set forth above. Therefore, restriction for examination purposes as indicated is proper.
5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1631

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
